DETAILED FABRIC INFORMATION

TENCEL

Tencel fabric is an amazing eco friendly fabric that represents a milestone in the development of environmentally sustainable textiles.

Tencel is a natural, man made fiber which is also referred to as Lyocell.

Made with wood pulp from sustainable tree farms, tencel textiles are created though the use of nanotechnology in an award-winning closed-loop process that recovers or decomposes all solvents and emissions.

Though it's certified by the international Forest Stewardship Council (FSC) and 100% biodegradable, perhaps the greatest benefits are the variety and exceptional comfort you can experience with tencel duvet covers.

Main characteristics of Tencel are:

- extreme soft
- absorbent
- very strong when wet or dry and
- resistant to wrinkles

DETAILED FABRIC INFORMATION

Blend of 50% Bamboo and 50% Cotton

Bamboo is an incredibly eco-friendly source for fabric. When growing, bamboo does not require any pesticides, irrigation or fertilisers to enhance its growth. It has a natural anti-bacterial that grows within it.

It is 100% biodegradable and is the fastest growing plant on the planet, with some records showing a growth of almost 120cm in a 24hr period.

Bamboo fabric is one of the most ecological and economical products available today and many believe that because bamboo is long lasting, super soft, aesthetically pleasing, economical and ecological, that it is the "Fabric of the Future".

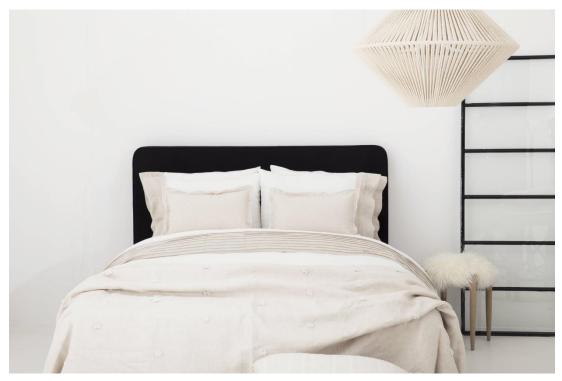

Bamboo is 60% more absorbent than cotton, which makes it the perfect fabric to use in our Home Linen.

Since Bamboo is so extremely soft, fabrics of 100% Bamboo are not as strong as Cotton. In order to make it "the best of both" we made a blend of 50% bamboo and 50% Cotton. Super soft and durable !
